DAILY VISUAL INSPECTION CHECKLIST

for 1145-4 Offshore Personnel Basket, 4-Person

To secure a safe personnel transport in the basket. It is essential, that the platform supervisor makes a visual inspection before any transport takes place. The following checklist descripts in 7 steps, what must be checked during the inspection. The position numbers refer to the illustration on page 5. The basket may not be used for personnel transport, if any of these parts has visual damage. The use of a damaged basket endangers the life of personnel in the basket and on the ground or vessel.

			Checked	
	1	Check visually for damages (bends and cracks) on steel frame.		
	2	Check visually bumper fender (Pos. 21)		
	3	Check visually oval top fenders (Pos.14), round top buoy (pos.13)		
	4	Check visually lifting sling and compensator (Pos.19a;19c;19d;20a;20c;20d), master link (Pos. 39) and pad eyes (Pos.37 & 38)		
	5	Check visually all 4 rope sections (Pos.1)		
	6	Check visually guide ropes (Pos.9) and weak links (Pos.11)		
	7	Check function of closing straps for basket exits (Pos.28).		
		Note: Compensator (pos.19d/20d) shall be replaced every 12 months. New complete certified lifting sling must be mounted minimum every 5 years
